ICT Initiatives in NUR

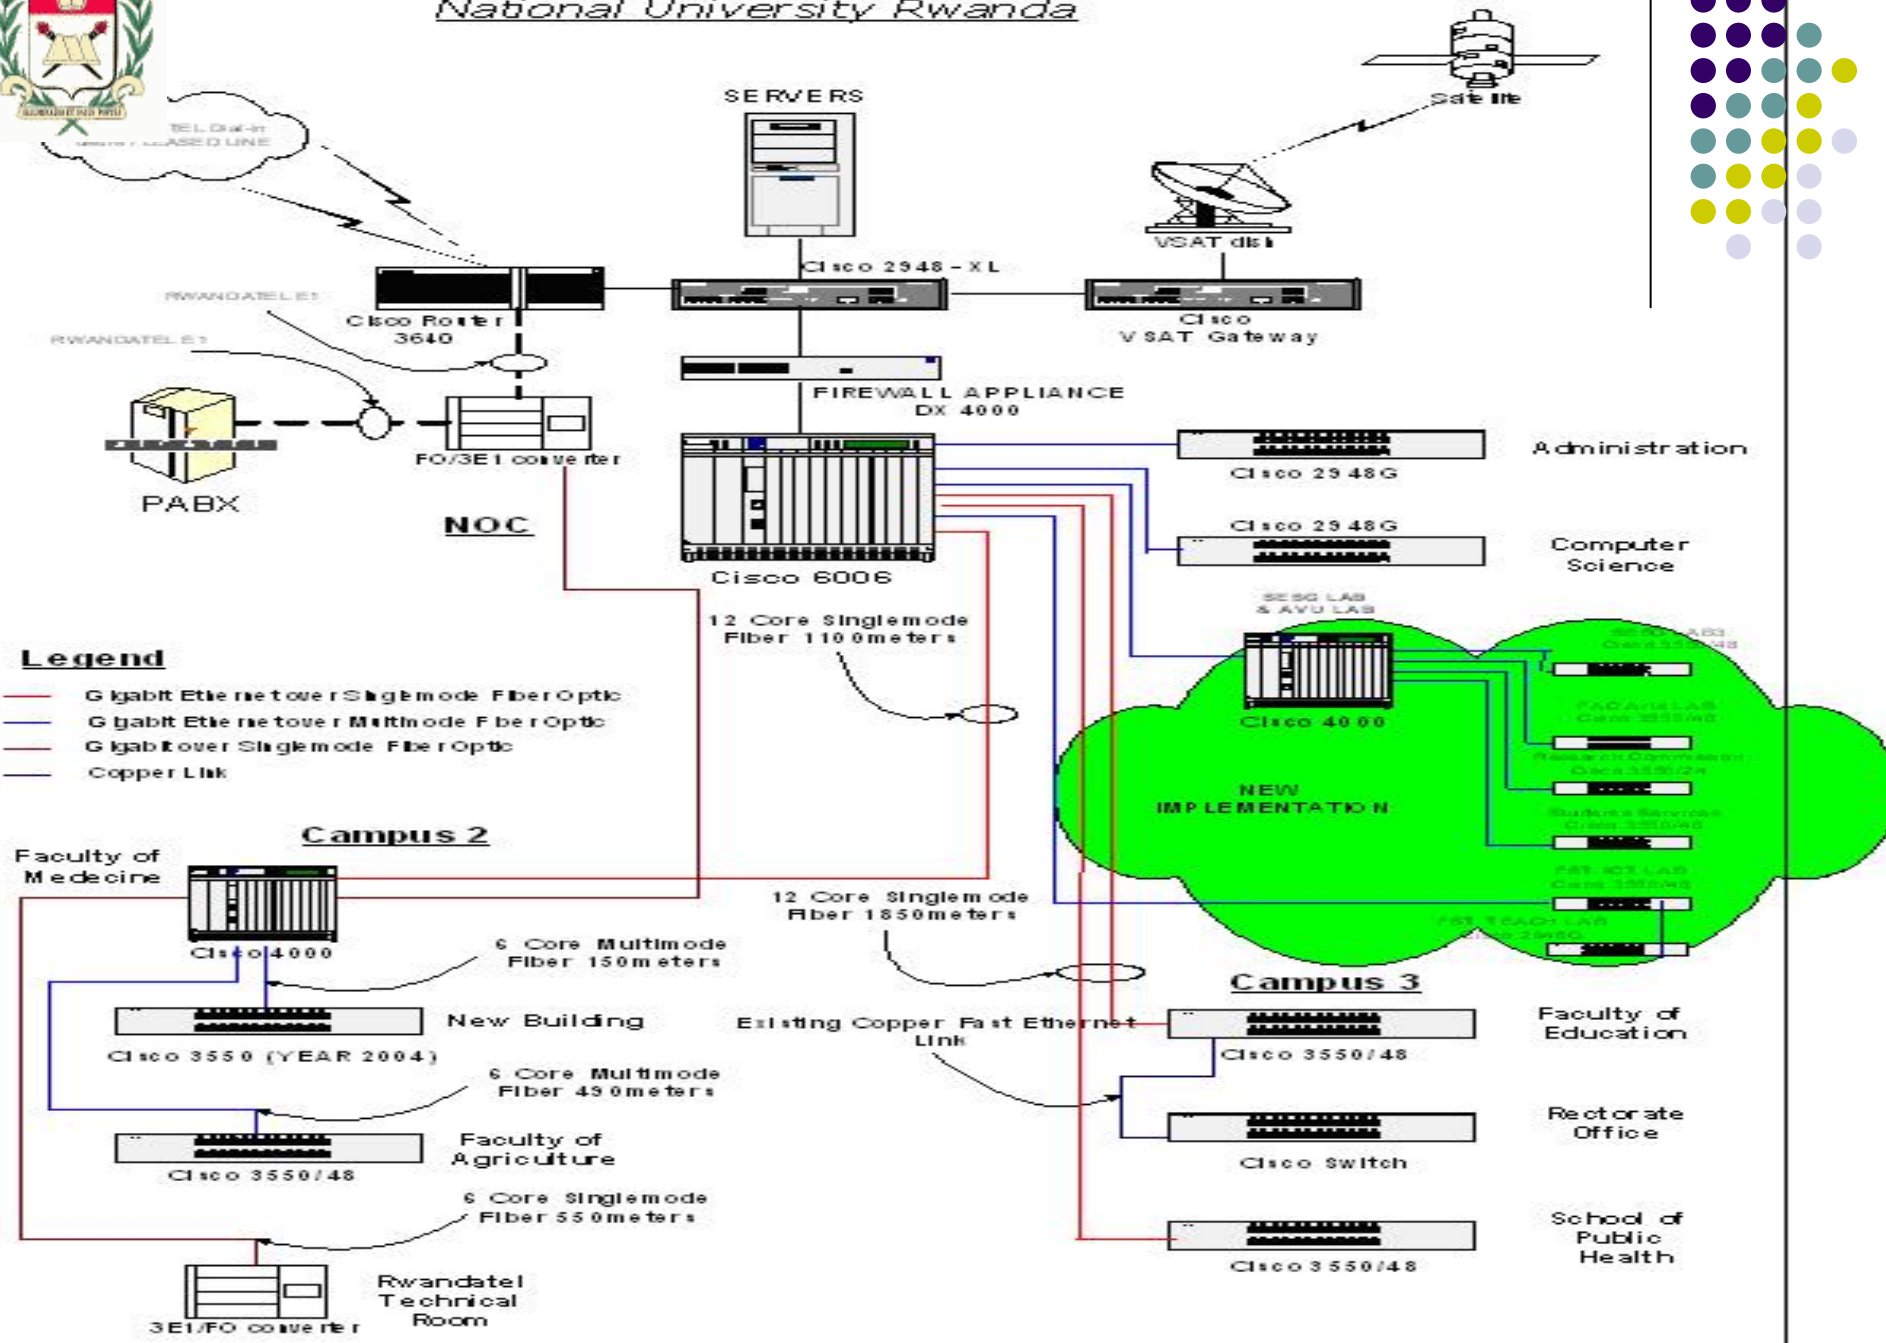

The NUR ICT Center

- Established in the NUR in 1995 with a main aim of promoting ICT for teaching and research purposes.
- In charge of:
 - Infrastructure Development (LAN and WAN setup)
 - Acquisition and Deployment of new ICT equipments
 - Database and Software Development
 - Capacity Building (Cisco Regional Academy, Sun Technology lab)
 - Service to the Collectivity:
 - Telecenters
 - Training

Legend

- Gigabit Ethernet over Singlemode Fiber Optic
- Gigabit Ethernet over Multimode Fiber Optic
- Gigabit over Singlemode Fiber Optic
- Copper Link

NUR Campus Area Network

- 3 main sites and buildings connected through Monomode and Multimode Optic Fiber
- Wired LAN (Cat 5, Cat 6)
- 1000 Computers and 160 Sun Ray Thin Clients
- More than 35 servers mostly running the Unix Operating System.
- Bandwidth: 2 Mbps Up / 768 Kbps Down
- More than 10 small remote sites

Wireless local loop Access for the NUR

- Why?
 - Increase accessibility (Strategic plan)
 - More cabling request (420 points of connection during the last past 6 months)
 - To provide connectivity to remote NUR sites
 - Service to collectivity: Providing connectivity to 2 pilot sites (1 secondary school, 1 dispensary)
 - Extend the service to the South Province for some private and public institutions, schools, local business and homes.

Expected Outcomes

- Increased access to knowledge and information for the NUR community.
- Better productivity of NUR remote sites.
- Enhanced linkage in the overall process of delivering services to the community.
- Extension of the network using inexpensive and easy to setup networks.
- Contribute to bridge the digital divide by providing Internet access and empower local communities

Further steps

- Wireless:
 - Project Proposal
 - Project funding
 - Project implementation:
 - Site Surveying
 - Deployment
 - Measurements
- Voice over IP for the NUR and the Rwandan Education Network through Optic fiber

THANK YOU
