

# Gsm frequencies analyzer

Measurements carried out with GsmTrack (<http://wireless.ictp.it/gsm/gsmtrack/>) over the specified frequency range and antenna. Remember that most TV signals are vertically polarized. The received signal level measured in dBm is dependent on the antenna gain and orientation.

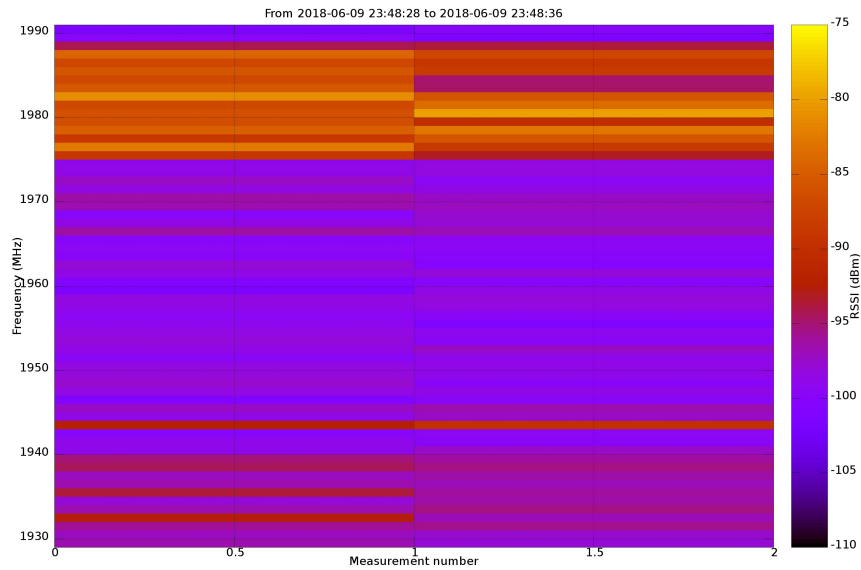

## Campaign measurements info

Info	Value
Campaign date:	2018-06-09
Campaign duration:	0:00:08 (hour:min:sec)
Route length:	0.0 Km
N. points:	3
Country:	no info
Country Code:	US
Place of measurement:	West Cedar Rapids
Region:	no info
Population:	0

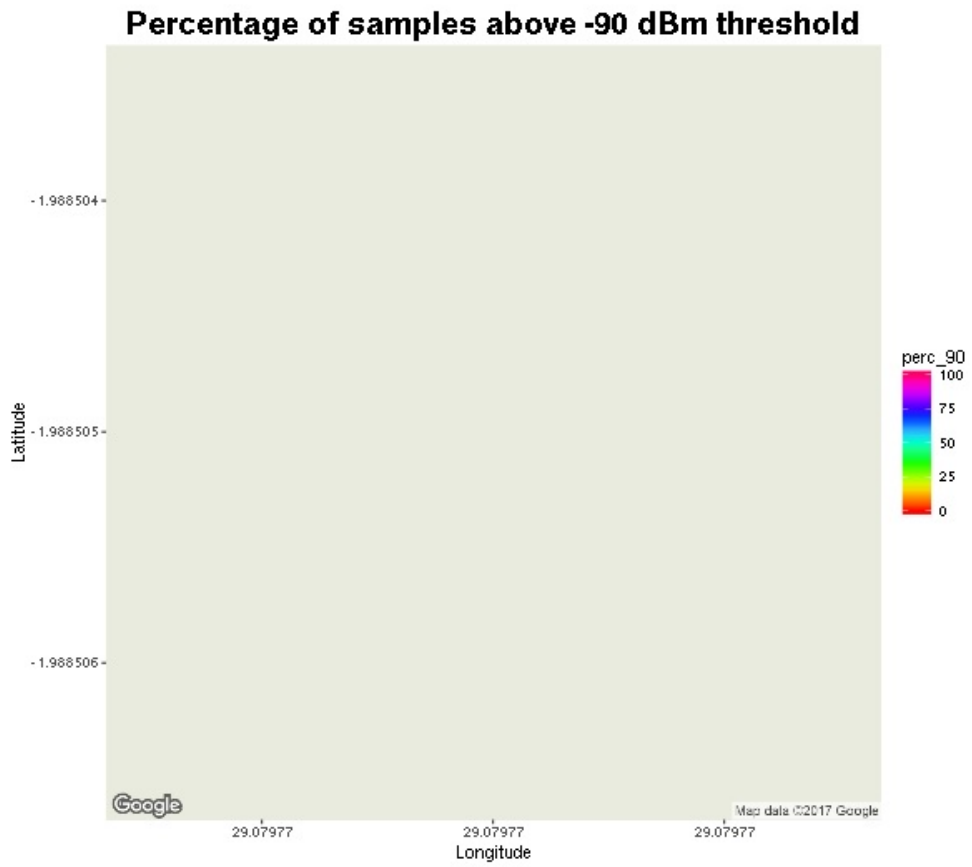

# Spectrum Maps

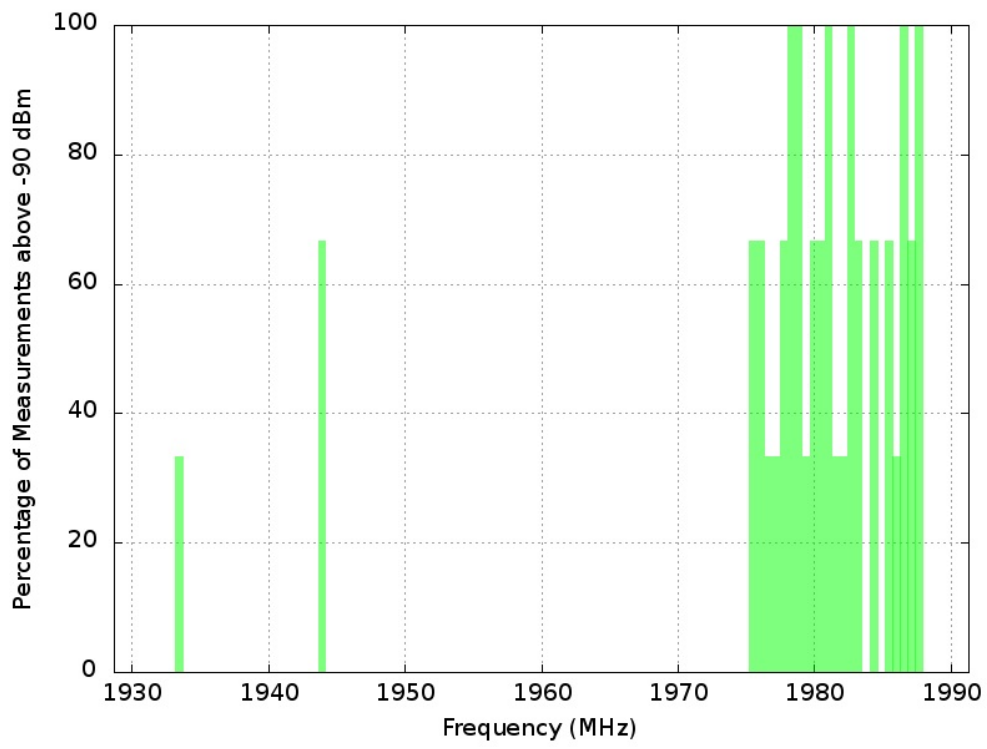

The first image shows power levels over time (number of measurements), the following images show different thresholds of spectrum occupancy.

## Percentage of samples above -85 dBm threshold

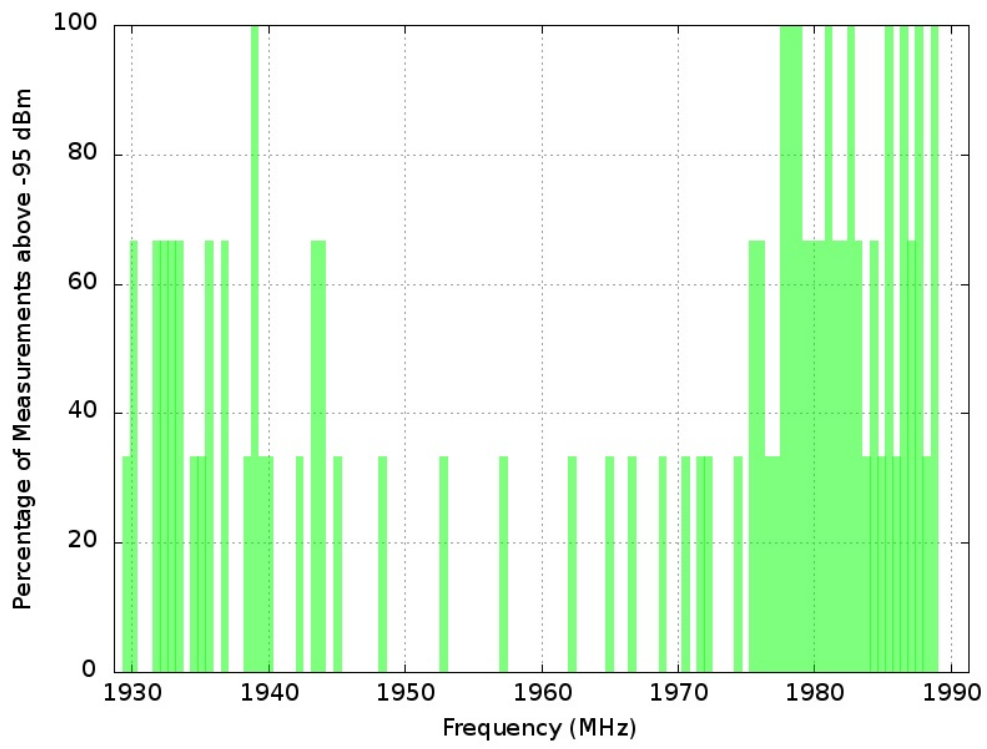

Percentage of samples above -95 dBm threshold

**Percentage of samples above -100 dBm threshold**

## Sponsor

The project was supported by the Shuttleworth Foundation (<https://www.shuttleworthfoundation.org/>)
