

# White Space analyzer

Measurements carried out with RFTrack (<http://wireless.ictp.it/twvs/rftrack/>) over the specified frequency range and antenna. Remember that most TV signals are vertically polarized.  
The received signal level measured in dBm is dependent on the antenna gain and orientation.

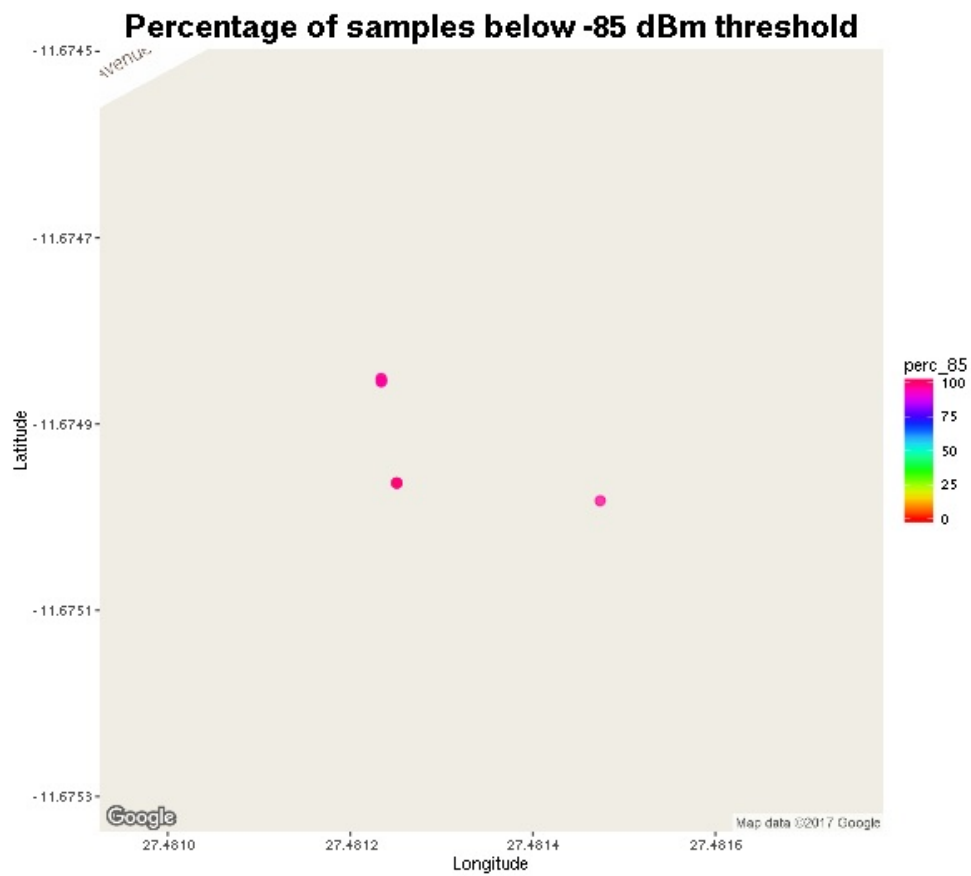

## Campaign measurements info

Info	Value
Campaign date:	2016-07-12
Campaign duration:	0:00:01 (hour:min:sec)
Route length:	0.0 Km
N. points:	4
Country:	Democratic Republic of the CongoCD
Country Code:	CD
Place of measurement:	Lubumbashi
Region:	Haut-Katanga
Population:	1373770

# Spectrum Maps

The first image shows power levels over time (number of measurements), the following images show different thresholds of spectrum occupancy.
