White Space analyzer

Measurements carried out with RFTrack (http://wireless.ictp.it/tvws/rftrack/) over the specified frequency range and antenna.
Remember that most TV signals are vertically polarized.
The received signal level measured in dBm is dependent on the antenna gain and orientation.

Campaign measurements info

Info	Value
Campaign date:	2018-04-26
Campaign duration:	-525:-40:-32 (hour:min:sec)
Route length:	42.8 Km
N. points:	4281
Country:	no info
Country Code:	PE
Place of measurement:	Urbanización Higuereta
Region:	no info
Population:	0

Spectrum Maps

The first image shows power levels over time (number of measurements), the following images show different thresholds of spectrum occupancy.
